ATHLETIC LEISURE

"Athleisure" is a fashion segment that is a combination of athletic and leisure wear. It includes garments such as yoga and pilates leggings, hoodies and cardigans.

Athleisure is widely used for sports, casual and work wear. The popularity of this segment has increased due to the growth of working from home during COVID-19.

Athleisure is casual, comfortable clothing that is designed to be suitable for both exercise and everyday wear.

Natural & Quick Dry
cotna
Polyester

cotna is a cotton-like polyester yarn with the touch of a natural fiber and easy care function. It preserves the touch and absorption of a natural fiber while improving shape stability, pilling and moisture management.

Natural and comfortable touch

Quick absorption and fast drying

Great pill resistance

Recycled cotton-like-regen cotna

Fundamental of cotna touch

— Soft touch and low shrinkage segment
— High shrinkage segment

Absorption, Diffusion, Evaporation System

creora
PowerFit

High-power performance with Function

creora® is a spandex with high power and excellent heat resistance. It maintains its fabric power and will even set at high temperatures and during re-dyeing. In particular, this enables deeper colors and better fastness when colored with disperse dyes.

Active Stretch

Superior Shaping

Compression

You can achieve all of your favorite athleisure designs, colors and fastness requirements with KISCO's range of products. Our EXW, EXWN and EXW-SP product lines offer a variety of features for colors while our Synolon EXW-SP dyes are best for black shades.

We will start our journey to the Athleisure Market together.

01 / SYNOLON EXW

Synolon EXW dyes are state-of-the-art disperse dyes with the highest wash fastness. They meet the requirements of the major retailers and even the most severe fastness tests.

02 / SYNOLON EXWN

Synolon EXWN dyes are high build up dyes with high wet fastness properties. They can achieve good wet fastness with economical recipes. They are suitable for dyeing blends such as polyester/spandex.

03 / SYNOLON EXW - SP

Synolon EXW-SP dyes were developed specifically to improve dry heat fastness. These dyes give the highest wet fastness black for high performance. They show the lowest staining on spandex for polyester blend fabrics.

NB brand

NB brand is the only sports company with more than 100 years of history and is a company that demands high quality. Since color fastness may decrease due to friction during exercise, you must select and use high quality dyes, such as Synolon EXW/EXWN, that have good rubbing and wet fastness.
