FOR KYOCERA PAPIJET TxRK 403

Based on our extensive knowledge of reactive dyestuffs, KISCO developed reactive inks to illustrate a large color space in digital textile printing for cellulose fibers. The PAPIJET TxRK series are reactive inks optimized for Kyocera heads and have been approved by a number of leading printer manufacturers. Our first generation ink, PAPIJET TxRK has been certified by Kyocera. The ink formulations for all 8 colors of the PAPIJET TxRK series are designed to present the best runnability. The PAPIJET TxRK series are ecologically-friendly, water-based, reactive inks with overall good fastness, outstanding fast dry properties, excellent stability and reproducibility.

PAPPIJET
INKS FOR DIGITAL TEXTILE AND UV PRINTING

PAPIJET TxPT-CLK 20 | TxPT-CDB 50

KISCO develops and produces pre-treatment solutions for pigment inks. These enhance color strength and maintain the fastness on fabrics. Our PAPIJET TxPT-CLK20 is optimized for printing on white, cotton fabrics. It can increase the color strength of PAPIJET TxP/TxPK 201 inks by up to 70%. Our PAPIJET TxPT-CDB50 is optimized for DTG printing. It provides good protection and improves print quality.

For DTP : TxPT-CLK 20

Dilution Ratio : 20%

Dilution Ratio (%)	Strength(%)			
	Cyan	Magenta	Yellow	Black
20%	148	169	191	166

* STD: TxP 201 Untreated Fabric

Padding Condition : pick-up 60~70% / Dry Condition : 105°C, 1~2min

PAPPIJET
INKS FOR DIGITAL TEXTILE AND UV PRINTING

PAPIJET TxPF FOR EPSON

KISCO develops and produces high-color, high-fastness, water-based pigment inks that are based on advanced pigment dispersion technologies. Our Direct-To-Film (DTF) are inks optimized for Epson heads. They deliver stable print quality, bright colors and excellent fastness. DTF inks are eco-friendly products that do not contain hazardous substances such as halogenated organics. Their safety is certified under RoHS 2.0.

DTF inks are printed onto films which can then be applied to substrates using a heat transfer process. Applications include a wide variety of textile fabrics and clothing. DTF printing is a lower-cost process that provides great flexibility to deliver high quality, eye-catching results.

PAPPIJET
INKS FOR DIGITAL TEXTILE AND UV PRINTING

FOR EPSON FOR KYOCERA PAPIJET TxP 201 | TxPK 201

Our PAPIJET Digital Textile Pigment inks deliver high quality prints on a wide range of fabrics. The inks give excellent output stability and are optimized to print with both Epson (TxP) and Kyocera (TxPK) heads. The eco-friendly inks are simple to process and require no further treatment. Prints are soft to touch and exhibit excellent rubbing fastness. The inks give excellent whites that also act as a strong base to deliver clear images.

PAPIJET LTIK 402 FOR KYOCERA

PAPIJET LTIK 402 has been developed for transfer sublimation printing and is compatible with Kyocera print heads. It shows excellent runnability on all printers equipped with Kyocera KJ4B print heads. It is a water-based, dispersed, eco-friendly ink for digital sublimation printing with the highest transfer yield. PAPIJET LTIK 402 has outstanding transferability on coated and uncoated paper and exhibits higher strength than other sublimation inks. It also displays bright shades with good fastness properties.

PAPPIJET
INKS FOR DIGITAL TEXTILE AND UV PRINTING

PAPIJET LTI 403 FOR EPSON

To print on polyester fabrics without steaming and washing, sublimation printing, also known as transfer printing, is the solution. You firstly print the image onto sublimation paper using PAPIJET LTI 403 inks and then transfer the image from paper to the polyester fabric. PAPIJET LTI 403 is a water-based, disperse, eco-friendly ink for digital direct and sublimation printing with the highest transfer yield using a high concentration ink. PAPIJET LTI 403 shows excellent transferability especially on uncoated paper and exhibits higher color strength than other sublimation inks. It also delivers bright shades with good fastness properties.

ROADMAP TO
ZERO

Qualification

Type	Explanation
bluesign®	Since 2010, KISCO has been certified under the bluesign® system. The bluesign® system is a sustainability framework for the entire textile supply chain. The process tracks the progress of companies in five key areas: resource productivity, consumer safety, air emissions, water emissions and occupational health and safety.
GOTS	The Global Organic Textile Standard (GOTS) is the worldwide leading textile processing standard for organic fibres, including ecological and social criteria, backed up by independent certification of the entire textile supply chain. KISCO's compliance with GOTS is certified by ECOCERT.
ZDHC	The ZDHC Foundation manages the Roadmap to Zero Programme with the aim of phasing out hazardous chemicals in the textile, apparel, footwear and leather value chain by promoting safer chemistry and driving innovation.
GREENGUARD	GREENGUARD Certification, issued by UL, assesses and certifies products like building materials and furniture for compliance with indoor air quality standards. It rigorously measures emissions of substances like volatile organic compounds, formaldehyde, and particles to ensure environmental and health safety.
ECO PASSPORT by OEKO-TEX®	ECO PASSPORT BY OEKO-TEX® is a chemical, dye and additive certification used in textile and leather production. This means that they are responsible for production and handling chemicals to protect people and the environment, and our certified dye and ink products are proof that they are suitable for sustainable textile production.
